ENERGY MODELING

Established in 1987 as a specialty civil engineering firm, OEI began developing its Mechanical/ Electrical/ Plumbing (MEP) practice in 2013. Positioned with thoroughly developed and proven management protocols, strong industry relationships, and a top-down commitment to integrity, design quality, and training and education, OEI provides a strong MEP department with deep experience and qualified personnel.

We provide full design and analysis services, construction drawings, energy audits, energy modeling, construction phase services, and condition assessments to the federal (USACE, VA, CBP, etc), state, higher education, healthcare, hospitality, industrial, municipal, and commercial markets.

With abilities in eQUEST and Trane Trace 700, our Energy Modeling complies with:

- Leadership in Energy and Environmental Design (LEED)
- Guiding Principles for Sustainable Federal Buildings
- Austin Energy Green Building (AEGB)
- Energy Star Portfolio Manager
- Housing and Urban Development (HUD)
- National Green Building Standard (NGBS)
- Green Communities
- Green Globes
- Department of Consumer and Regulatory Affairs (DCRA)
- COMcheck – Building Permit
