MUNICIPAL CUSTOMERS

OEI's Civil/Municipal Group is led by seasoned project manager and senior engineer, Garry Kraus, PE, MBA, who brings decades of project management and engineering expertise on projects varying from minor roadway design to pedestrian trail design, to thoroughfare reconstruction. OEI's Water Resources services are led by Gerardo Ocañas, PE, PhD who brings impressive command of a broad range of complex water issues including experience in two-dimensional hydraulic simulation of complex drainage, river, stormwater, and wastewater collection systems.

OEI has been serving our North Texas area municipal customers for as long as we have been in business, over 30 years. Over the decades we have served dozens of local municipalities. We offer our clients a long history of local experience and knowledge. Our municipal experience is primarily within the DFW metroplex so, we understand and are very familiar with our area's unique characteristics: watersheds, topography, soils, climate, and regulatory agencies. This knowledge means that OEI is positioned to serve our municipal clients with precise, efficient, and responsive results.
